TECHNICAL KNOWLEDGE

Data & Cloud: BigQuery (data warehouse), Google Cloud Platform, SQL, MySQL, data pipelines/ETL, AWS
AI & Engineering: AI Prompting, LangChain, Java, C++, PHP, MCP server development
Analytics & BI: Looker Studio, A/B testing, Python, R, D3 data visualization, Grafana
Front-End & Web: HTML/CSS, JavaScript, TypeScript, React, Figma (prototyping), accessibility testing, SEO impact analysis
Misc. Tools: Git, Linux, Jira, Google Suite (Sheets, Calendar, Slides), Microsoft Office (Excel)

WORK EXPERIENCE

Etsy June 2023 – Aug 2026
Software Engineer II *Remote*
- Mapped missing data powering analyst's Looker dashboard to inform stakeholders on progress towards financial goals
- Built listing-to-curated-page BigQuery dataset from Etsy's data warehouse, mapping 900,000+ listings with up to 3 curated pages each to power a navigation recommendation tool
- Proposed listing datasets as context for buyer-facing AI app (MCP) to better inform consumers in their purchase process
- Structured web prompt data dictionary of event and experiment data, serving as a resource for 3-5 product teams
- Directed discussion and implementation of standards for AI-assisted (agentic) coding, decreasing code approval wait time by 50%
- Crafted Deals page analytics plan and delegated implementation tasks to 5 engineers to inform KPI metrics

Etsy May 2022 – Aug 2022
Software Engineer Intern *Remote*
- Evaluated new feature with TensorFlow random forest model to improve rankings of grouped-listing recommendations
- Developed 3 A/B tests, setup KPI dashboards, and facilitated post-test analysis sessions to improve grouped-listing UI experience.
- Attended recurring lessons on new front-end tools and programming design standards to grow technical skills

Vertex Pharmaceuticals July 2021 – December 2021
Data Engineer Co-op *Boston, MA*
- Designed data model for manufacturing documents, crafting layout for reliably maintaining large-scale records
- Built SQL database managing 100+ manufacturing records, increasing querying efficiency of substandard materials

College of Engineering, Northeastern University Sept 2022 – May 2023
Office Assistant *Boston, MA*
- Organized and recorded student attendance at career events into Excel database to follow-up with additional resources
- Oversaw appointment logistics for 15-20 students weekly covering greeting upon arrival and creating calendar blocks
- Maintained organization of space, including setup for department events, to provide support for staff

Center for Student Involvement, Northeastern University Feb 2021 – July 2021
Front-Desk Assistant *Boston, MA*
- Managed status of 50+ external contracts for campus events on Monday board by reviewing and updating
- Served as point of contact for 590+ student organizations to resolve problems raised within event planning
- Monitored center activity by arranging package pickup/delivery for groups and granting access to amenities for visitors

PROJECTS

Bias in Boston Vehicle Stops (Python) April 2021
- Performed SciPy tests on Boston PD dataset, to find significant differences between stop rates of Black vs White drivers
- Applied Scikit-learn machine-learning algorithms to the cleaned dataset to predict driver race across multiple features

Wordle Visualization (HTML/CSS/JS) April 2022
- Constructed a Wordle dashboard, with an interactive figure displaying each solution's rarity and user performance
- Prototyped website on Figma and created final application using the JS D3 library to enhance the visual appeal

EDUCATION

Northeastern University, Khoury College of Computer Sciences
Bachelor of Science in Data Science *Boston, MA*
